Education

University of California, Santa Cruz — Bachelor of Science in Computer Science

Technical Skills

Languages: Python, C++, Java, JavaScript, HTML/CSS

Frameworks & Libraries: FastAPI, TensorFlow, scikit-learn, pandas, NumPy, Phaser

Tools: Git, Figma, Wireframing

Core Strengths: Problem Solving, Data Analysis, UI/UX Thinking

Projects

[Real Estate Visualizer — AI Image Editing Web Application](#)

Python, FastAPI, JavaScript, HTML/CSS, Diffusion Models, Computer Vision

- Built a full-stack AI image editing web application for virtual home staging using a FastAPI backend and browser-based frontend.
- Integrated diffusion-based generative image models through Hugging Face to support image generation and targeted editing workflows.
- Implemented mask-based image manipulation features that let users add, remove, and modify objects within real estate photos.
- Developed image-processing pipelines for upload handling, preprocessing, model inference, and post-processing while preserving original room layouts.

[Multi-Label Weather Condition Predictor](#)

Python, TensorFlow, Pandas, scikit-learn

- Built a neural network to classify daily weather conditions from hourly temperature, humidity, wind, and pressure data.
- Cleaned and merged real-world datasets with pandas, normalized features with StandardScaler, and encoded multi-label outputs with MultiLabelBinarizer.
- Trained a Keras model with dropout layers and evaluated performance using classification metrics and Hamming loss.
- Generated daily forecasts from the most recent 24-hour input window.

[Wreck-It-Ralph Game Clone](#)

JavaScript, HTML5, Phaser

- Developed a browser-based 2D game inspired by *Wreck-It Ralph*, featuring core scenes like Play, Menu, and Game Over.
- Implemented character movement, game state transitions, and collision logic using the Phaser framework.
- Created reusable prefabs for Ralph, Felix, and interactable elements.
- Deployed a complete HTML5 web game with asset bundling.

Professional Experience

Real Estate Agent

Client Relations, Negotiation, Customer Service

- Worked directly with clients to understand needs, address concerns, and support property-related decision-making.
- Built communication and negotiation skills through ongoing client interaction, coordination, and issue resolution.
- Applied problem-solving in fast-paced situations requiring responsiveness and attention to changing client needs.
